

Cse 456 Midterm Project

Deadline: June 11 23.50

QUESTION:

In this project you are going to prepare a prototype user interface for an application designed to be used by high school students for self learning. Since the tasks can vary, you are free to design your own education scheme for high school students. Basically, you are developing a primitive type of alternative high school education method. You are free for your own variations, there is no single way of doing the project.

You are suggested to use the following software for free:

<https://www.justinmind.com>

WHAT TO SUBMIT

You will submit the prototype in zip format containing the following (in zip together):

- 1- Your prototype file
- 2- Documentation in pdf
- 3- Video **link** that you make in youtube explaining the user interaction by demonstration

Make sure that you do your own work.
